

INFORMATION SHEET for Physics students, who are planning a semester abroad

PLANNING:

Students, who are planning to study a period abroad, need to prepare a course catalogue for the semester according to the following criteria:

Bachelor's degree programme:

- Courses which have been completed successfully abroad can only be used to fulfil the requirements for the compulsory courses of the bachelor's degree programme in Physics (Curricula 2017, 2021) if their content closely matches that of the courses listed in the curriculum. For this reason, an exact description of the respective course taught at the host university is required.
- In addition, courses with a maximum of 10 ECTS (Curriculum 2017) or 12,5 ECTS (Curriculum 2021) can be recognised as free-choice subjects for the bachelor's degree programme in Physics (Curriculum 2017, 2021)

Master's degree programme in Technical Physics:

- The compulsory modules A-D (according to § 8 of the Curriculum) can only be recognised if their content closely matches that of the respective courses listed in the curriculum.
- For the physics specialization modules (according to § 9 of the Curriculum) courses up to a maximum of 27 ECTS can be recognised if there are no significant differences to the course contents. The substitution of complete physics specialisation modules by courses completed abroad requires separate approval by the Officers responsible for study matters.
- For the general elective module (according to § 9 B of the Curriculum) 15 ECTS earned in physics-related courses can be recognised.
- As free-choice subject (according to § 10 of the Curriculum) courses with a maximum of 10.5 ECTS can be recognised.

Master's degree programme in Physics:

- The compulsory module G (according to § 8a of the Curriculum) can only be recognised if their content closely matches that of the respective courses listed in the Curriculum.
- For the physics specialization modules (according to § 9 (3) of the Curriculum) courses up to a maximum of 45 ECTS can be recognised if there are no significant differences to the course contents. The substitution of complete physics specialisation modules by courses completed abroad requires separate approval by the Officers responsible for study matters.
- As general elective module (according to § 9 (4) of the Curriculum) courses with a maximum of 9 ECTS can be recognised.
- As free-choice subject (according to § 10 of the Curriculum) courses with a maximum of 6 ECTS can be recognised.

ACQUISITION:

The pre-notification is to be made for Bachelor students and Technical Physics students in TUGRAZonline and for Physics students in UNIGRAZonline according to the following [instruction](#).

Important: For the respective courses at the host university, an exact description must be entered under "Topic"!

AFTER RETURN:

If NO CHANGES in the proposed courses offered occurred during the study abroad period, the following procedure should be followed:

- Submit the Transcript of Records and description of the grading system of the host university by e-mail to physik.mpug@tugraz.at

In case of CHANGES, to the courses listed in the pre-notification:

- Submit the Transcript of Records and description of the grading system of the host university by e-mail to physik.mpug@tugraz.at
- A decision is to be generated on the basis of the pre-notification (which can subsequently be revised)
- Change entries and send the list of requested recognitions to physik.mpug@tugraz.at
